PROFESSIONAL SUMMARY

Backend-focused Software Engineer with 3.5 years of experience developing cloud-native applications, microservices, and AI integrations. Proficient in Python, Node.js, PostgreSQL, and cloud deployments on Azure and GCP. Experienced in Docker containerization and CI/CD automation. Eager to leverage strong system architecture skills and growing React.js expertise to deliver impactful AI tools for national safety.

TECHNICAL SKILLS

- **Back-End:** Python (FastAPI, Django), Node.js, Express.js, REST APIs, GraphQL
- **Front-End:** HTML5, CSS3, JavaScript, React.js (Intermediate)
- **Databases & Cloud:** PostgreSQL, Redis, MS Azure, GCP, Docker, Kubernetes
- **Tools & Practices:** Git, CI/CD pipelines, PyTest, Agile Kanban

PROFESSIONAL EXPERIENCE

Backend / AI Integration Engineer | AI Solutions Startup

Jan 2023 – Present | Singapore

- Designed scalable Python backend services to serve LLM and computer vision model outputs to front-end clients in real time.
- Deployed containerized applications using Docker on MS Azure, managing microservice orchestration.
- Built full CI/CD deployment pipelines using GitHub Actions, enabling automated testing and zero-downtime releases.
- Developed internal admin interfaces using basic React.js and HTML/CSS.

Software Engineer | System Integrators Pte Ltd

Jul 2021 – Dec 2022 | Singapore

- Maintained database schemas, writing complex PostgreSQL queries and optimizing API response times by 30%.
- Conducted troubleshooting and root-cause analysis for production bug fixes across distributed services.

distributed services.

EDUCATION

- **Bachelor of Engineering (Computer Engineering)** | Nanyang Technological University (NTU)
